

Persistent homology of latent encounter loops (Vietoris-Rips, test_b, n=42, rep case G+2.00_D0.50_Y+0.10). H1-lifetime ratio rollout/DNS: JEPA 0.66 [0.20, 1.30], Fukami 1.05 [0.63, 1.22] (ratio confounded by cloud scale). Robust signal: JEPA encodes a single clean loop (median 1 H1), Fukami fragments (median 4).
